

Purple Heart User Interface Patch DG*5.3*343

The following are changes to the PIMS V. 5.3 User Manual, Registration Menu and Supervisor ADT Menu, as a result of Patch DG*5.3*343.

These changes will be incorporated into the on-line copy of the manual once the patch is released to the field.

The URL for the ADT documentation is: <http://vista.med.va.gov/vdl/#App55>

1) Options added to the Registration Menu

Purple Heart Request History

The Purple Heart Request History option is used to view the history of a Purple Heart request for an individual patient. The only prompts are for patient name and device.

Information provided includes station and division (at multi-divisional facilities), patient name and social security number, current Purple Heart indicator, status, remarks, and name of the individual who updated the information.

The STATUS field may contain the following values.

Pending - set when the Current Purple Heart Indicator contains a YES value.

In Process - set when message received from the HEC (Health Eligibility Center).

Confirmed - set when confirmation message is received from the HEC.

The REMARKS field will only contain a value if the CURRENT PURPLE HEART INDICATOR field is NO.

Purple Heart Status Report

This option is used to view a list of all patients with current Purple Heart requests with a status of *Pending* or *In Process*. The report is sorted by number of days since the last status change in either ascending or descending order (user-selected). The only prompts are for sort order and device.

Information provided includes station and division (at multi-divisional facilities), and for each request, patient name and social security number, days pending, and date pending. Totals are provided at the end of the report.

2) Addition of Data Group 16 to Screen 6 of the Registration Supplement

```

                                MILITARY SERVICE DATA  SCREEN <6>
PATIENT NAME; SSN                                     TYPE
=====
[1] Service Branch   Service #   Entered   Separated   Discharge
-----
[2]      POW:        From:        To:        War:
[3]      Combat:     From:        To:        Where:
[4]      Vietnam:    From:        To:
[5]      A/O Exp.:    Reg:        Exam:        A/O#:
[6]      ION Rad.:    Reg:        Method:
[7]      Lebanon:    From:        To:

[16] } Purple Heart:
```

<RET> to CONTINUE, 1-16 or ALL to EDIT, ^N for screen N, or '^' to QUIT:

DATA GROUP 16

CURRENT PH INDICATOR - YES/NO/NULL - If YES, the STATUS field is automatically set to PENDING and further display of Screen 6 will add this field to the display. If NO, the REMARKS field is automatically set to VAMC and further display of Screen 6 will add this field to the display. If YES or NO is entered, you will be prompted for DIVISION at multi-divisional sites.

This data group becomes inactive if the CURRENT PH INDICATOR field is answered and the consistency check is completed.

STATUS - Values include Pending, In Process, Confirmed. This field is not editable by the user.

REMARKS - Values include Unacceptable Documentation, No Documentation Received, Entered in Error, Unsupported Purple Heart, VAMC, Undeliverable Mail. This field is not editable by the user. This field will only contain a value if the CURRENT PH INDICATOR field is NO.

3) New parameter added to the Supervisor ADT Menu, ADT System Definition Menu, MAS Parameter Entry/Edit Option

PURPLE HEART SORT

Enter the sort order used by the tasked Purple Heart status report. Choose from A-Ascending or D-Descending (default value).
